

# CREATE THE VIEW

In this example, the related nodes we want displayed on book product pages are “Events”.

The screenshot shows the Drupal Views configuration interface for a new view. The interface is divided into several sections, with red arrows and numbers 1 through 9 highlighting specific steps:

- 1**: The **View name** field is set to "Related Events".
- 2**: The **Show** dropdown is set to "Content", **of type** is set to "All", and **sorted by** is set to "Newest first".
- 3**: The **Create a page** checkbox is unchecked.
- 4**: The **Create a block** checkbox is checked.
- 5**: The **Display format** dropdown is set to "Unformatted list of titles (linked)".
- 6**: The **Items per page** field is set to "5".
- 7**: The **Use a pager** checkbox is checked.
- 8**: The **FIELDS** section shows "Content: Title" selected.
- 9**: The **Add** button in the **FIELDS** section is highlighted.

Below the **FIELDS** section, a list of available fields is shown:

- Content: Event date**  
Appears in: node:event.
- Content: Event Type**  
Appears in: node:event.
- Content: Event Type (field\_eve**  
Delta – Appears in: node:even
- Content: Files**  
Appears in: node:book, node:;
- Content: Files (field\_files:delta**  
Delta – Appears in: node:book, node:;

The **Selected:** section shows "Content: Event date". The **Apply (this display)** button is highlighted at the bottom.

--	---

Save block 5

When visiting a book product page (yoursite.com/book/ISBN) for any book in a book list for an “Event” you should now see this block displayed showing all related “Events”.
